

Peugeot bebe 1913 inner clutch part 2

The dimensions of the 2 bus are:

Foto 1

44 mm outside dimension

Lager Type 6202

Foto 2

75 mm outside dimension

lager type 6202

At the bottom of this is another edge sizes are 55 mm and 3.2 mm high. See picture 4

Bus length 65 mm

But please note that Under this bus is a ring and if you do not first on the shaft then place the link is fixed. The sizes of this ring are 21 x 15 x 2 mm thick an important spare parts easier..

To place the link back to the following:

- 1) First, place the spacer ring
- 2) First glue the ring stuck to the Bush bronze (otherwise you're a long time working on getting the clutch plate to mount)

- 3) Apply grease to the 2 buses not too much
- 4) Place the spring on the shaft between there and slide Assembly.
- 5) The outer ring must be placed first for the axis
- 6) Place the clutch plate conical side out and place it there between is tricky.
- 7) Assembling the koppelingplaat is easier if you removes the pedals
